5 May 1954

MEMORANDUM FOR: Deputy Director of Central Intelligence

SUBJECT: Control of Dissemination and Use of Intelligence and Intelligence Information

1. CIA staff members, representing all interested Offices, have for over a year sought a solution to the problems of protection of sources and methods arising from the dissemination and use of intelligence and intelligence information. The most important consideration was the desirability of obtaining maximum necessary use of intelligence while, with a minimum of administration, protecting sources and methods.

2. After drafting a proposed DCID 11/2 to standardize control practices in the intelligence community, CIA staff officers met with representatives of the IAC agencies and the draft was further refined. The IAC representatives support the attached draft DCID 11/2.

3. The major objectives of the proposal are, through standardization, to reduce the number of control mechanisms, provide a common understanding of controls among the collectors, producers and disseminators, eliminate existing confusion, and, importantly, to provide a single written definition of control policy and procedure agreed by all concerned.

4. It is recommended that you approve for submission to the IAC the attached document which presents the draft DCID 11/2 for IAC approval.

JAMES Q. REBER
Assistant Director
Intelligence Coordination
